

## Current Concepts in Arthroplasty 2020

### "Modularity in Arthroplasty & Training"

Dear Friends,

The year 2020 has been like no other year before in our lifetimes. It has changed the world from "Reaching for the Heights" to "Fighting to Stay Alive". It has taken its toll in the form of loss of lives, livelihood and sanity. The new normal decides everything which we do now. The yester years and past seem like a dream. It is quite evident that the new world in the new normal will be a completely different one. The way we practise medicine and teach our students has undergone a sea change already. It is therefore intuitive that the exchange of scientific knowledge and wisdom don a new mantle.

The "Current Concepts in Arthroplasty 2020" is intended to be an exercise in changing the way we have transacted business in the past. While the subject of modularity in Arthroplasty has been a subject of great deliberation the "Modularity in Arthroplasty & Training" is the legacy of coronavirus 2019 and is the theme of the conference this year.

While the challenges involved are not lost on anyone it does provide an opportunity to demonstrate how flexible, tenacious and innovative the teachers can be. The 1 and 1/2 day programme on 31st October and 1st November will have participation from the eminent national and international faculty as always. The thrust will be on surgical demonstrations and wherever live surgery is a challenge you will benefit from a video recording of the procedure with live commentary from the surgeon who will answer your questions in real time during the various steps of the surgery. The case presentations, lectures and panel discussions will be online and it will be our earnest endeavor to make them lively. I assure you that you will find this academic extravaganza no less than the best virtual teaching activity you ever attended. We plan to present the best faculty and an excellent choice of subjects relevant to your day-to-day practice to make it worth your while. I wish to extend this cordial invitation to you to join us for **Current Concepts in Arthroplasty 2020** organised by the Department of Orthopaedics and Orthopaedic Research Society at the All India Institute of Medical Sciences, New Delhi. Let us learn together and enjoy the process!

Hope to see you participate in this grand academic event like in the past years.
