# CURRENT CONCEPTS IN ARTHROPLASTY 2014

**"CUTTING EDGE TECHNOLOGY IN ARTHROPLASTY"**

**August 16-17, 2014**

Dear Friends,

Come August and we are back with a new bouquet of academic bonanza for you. Year after year your ardent support for "Current Concepts in Arthroplasty" has fuelled our passion to deliver more – in quality as well as in content.

The theme this year is "Cutting Edge Technology in Arthroplasty". Recent years have seen the newer technologies enter the arena of arthroplasty and our attempt is to expose these to you. As always, we will be joined by eminent national and international faculty members to give you a memorable experience. Like every year, we plan several live interactive surgeries by the masters in the field to make the sessions exciting.

Additionally, didactic lectures and interactive sessions will help you update your knowledge and clear your mind of dichotomies. An evening reception of fellowship on the 16th August will help you get to know everyone closely and interact personally.

I look forward to see you at this event. Your presence at our show will be mutually beneficial and will make this event memorable.
