Invitation

Dear friends,

A burgeoning population of elderly Indians associated with poor bone health during their sunset year has rendered it obligatory for us to focus our attention on bone health of the elderly. Reduced mobility due to fragility fractures and/or degenerative diseases not only causes suffering but also incurs large direct costs of treatment as well as indirect costs including productivity loss to the care provider in the family. Moreover, the outcome of treatment in this population is often sub optimal due to serious comorbidities such as Diabetes and Coronary Artery Disease.

In order to enhance outcomes and improve longevity with mobility, Orthopaedic Research Society of AIIMS and Geriatric Orthopaedic Society of India have joined hands with Fragility Fracture Network India to organize Combined Meeting of Geriatric Orthopaedic Society of India (GOSI)-Fragility Fracture Network (India) (FFN) & Current Concepts in Arthroplasty (CCA) -2018.

The Theme of the meeting is "Increased Longevity with Reduced Fragility and Enhanced Mobility". The four day academic extravaganza will be held at the Jawahar Lal Auditorium at All India Institute of Medical Sciences, New Delhi from September 6th to 9th, 2018. The blockbuster event will invite participation from Orthopaedic Surgeons, Geriatricians, Anesthetists, Rheumatologists, Rehabilitation Specialists, Endocrinologists, Intensivists, Physiotherapists and Nurses. In essence, the purpose is to bring together everyone involved in geriatric orthopaedic care under one roof to interact and arrive at consensus on best practices.

The mega event will kickstart on the 6th September, 2018 with cadaver courses. The GOSI-FFN meeting will be held from 6th through 8th September 2018 and will comprise of Live surgeries, Didactic lectures, Panel discussions and Breakaway Sessions focused on Hip fractures, Osteoporotic vertebral fractures, and Proximal humerus fractures in elderly, FFN (India) and perioperative management of the elderly patient. The free paper session will invite papers on the conference theme and the best 3 papers presented by the post graduate students will attract cash prizes and certificate of appreciation.

The CCA will have a different flavor this year. Organized from 8th afternoon through 9th September, it will showcase only live Arthroplasty surgeries, demonstrated back to back.

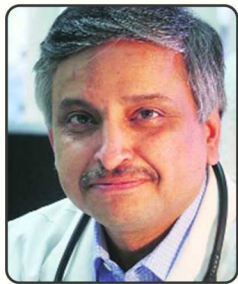

We already have commitment from accomplished international faculty from the fields of Orthopaedic Surgery, Geriatrics, Anesthesia, Intensive care and Nursing.

I am sure this maiden event will attract you to the arena with an unprecedented opportunity to interact with experts from various disciplines to provide better care to our elderly patients. This academic extravaganza will not be without recreation and we have planned a great evening of entertainment for you with the conference banquet.

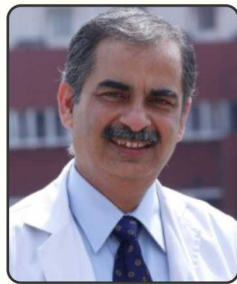

I look forward to welcome you all at All India Institute of Medical Sciences for this event and assure you of a great time and learning.
